TECHNOLOGICAL ADVANTAGES

California Cartage Express handles every detail associated with draying your container. This means using the latest technology to ensure information moves flawlessly from the port to the rail. We are electronically linked to all port terminals and our drivers use Nextel's Direct Connect.

We also employ Trinium's Transportation Management System, giving you the power to track your containers exact location and receive automated updates. Trinium's online visibility has revolutionized operations and eliminated gaps in the real-time flow of information.

We can prepare an operation procedure (SOP) at each of the ports we service. This allows our customers, who are C-TPAT certified, the ability to incorporate California Cartage Express as a strategic link in their supply chain.

- We have the highest rating from the Department of Transportation and the California Highway Patrol.
- We employ operators with perfect driving records and late model tractors in prime condition.
